Dear Colleague,

This trust is a site for an NIHR and INSPIRE supported multicentre project called ERUPT – Evaluation of Real-world Pulmonary Embolism Thrombolysis. I am the local lead for this project. The project has local Caldicott approval.

We aim to capture all patients who received thrombolysis for pulmonary embolism during a 1-year time period from 01/09/21 to 01/09/22.

To do this I would be grateful if you could conduct a search of electronic pharmacy records to determine when alteplase was administered within this time period. It would be ideal if you could provide the following:

- Trust/Hospital/NHS number
- Date of administration
- Location of administration
- Indication (if provided)

We anticipate the majority of administrations will be for stroke thrombolysis, hence location and indication information will help exclude these from the final patient list.

Many thanks for your help.

Yours sincerely,
